Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to receiving a text email message, classified in class 709, subclass 206.
- II. Claims 6-10, drawn to receiving a call, classified in class 379, subclass 70.

The inventions are independent and distinct, each from the other because of the following reasons:

Inventions I and II are mutually exclusive of each other, group I is directed to (a) receiving a text email message; (b) parsing the name of an intended recipient; (c) determining if the intended recipient is an authorized user; (d) if the intended recipient is authorized, assigning a message-specific indicia to the message; (e) if the intended recipient is authorized, appending a reply notice with the message-specific indicia to the message; (f) if a reply notice is appended, saving the email message with the reply notice appended thereto; and (g) if the intended recipient is authorized, transmitting the email message with the reply notice to the intended recipient. Group II is directed (a) receiving a call in an email server from the user of the portable electronic device; (b) determining if the caller is registered as a user of the email server; (c) obtaining a pre-assigned message-identifying code from the caller; (d) authenticating the message-identifying code; (e) requesting the caller to record a voice message; (f) recording the

voice message; and (g) transmitting the voice message to the user of the office-based terminal.

Because these inventions are independent and distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. In addition the classification of Group I separate classified then Group II. See MPEP § 608.01(b).
